COURSE TITLE: BUILDING INTERACTIVE DASHBOARDS WITH MS EXCEL (ADVANCED)
TRAINING PROVIDER: BRUNEI INSTITUTE OF LEADERSHIP AND ISLAMIC FINANCE (BILIF)

COURSE OBJECTIVE

Excel Dashboard is a page that allows managers and business leaders to track key KPIs or indicators and to decide appropriately. It includes diagrams / tables / views supported by facts. Nevertheless, not all reports are dashboards. Dashboard reports provide administrators with a high-level company summary. Excel is an excellent tool for producing powerful dashboards which allow managers to evaluate, inspect and alert on time.

In this advanced level, the focus are the dynamic reports/charts and interaction with the data. The Dashboard that we build will be adaptable to changes and user friendly. While ensuring the accuracy of the reports and information displayed in the Dashboard, the aesthetic of the Dashboard is very important too.

KEY COURSE INFORMATION

- Course Fee: $850.00
- Training Duration: 2 Days
